RestartVET

Project ID: 2020-1-BE02-KA226-VET-083119

Start: March 2021
Finish: February 2023

Co-funded by the
Erasmus+ Programme
of the European Union

ABOUT THE PROJECT

RESTART VET proposal attempts to find out the e-readiness of VET teachers for transition to online learning along with their views on this mode of learning transaction. The ultimate goal of RESTART VET is to encourage a 'digitalized centered' approach, also considering a human-based needs model of vocational education area, as it is considered as vital to know the VET teachers readiness and views about their online learning experience.

TARGET GROUP

The main objectives of the Restart VET project are to develop digital competencies for VET teachers, increase the pool of work based on learning opportunities for VET teachers and promote digital upskilling and/or reskilling of VET teachers as a priority in EU and enhance the proactive behaviors within educational process.

Outputs

1

A digital competence map describing the profile of VET teachers and trainers on digital skills

2

Training curriculum for VET teachers and trainers on e-learning methods and provided digital techniques

7 National Campaigns

IMPACT

As an overall result, RESTART VET will contribute with an innovative approach to encourage the development of digital skills of VET teachers in times of pandemic and provide useful guidelines, methods and tools for both supporting them with digitally tech-based pedagogical approaches for educational programs and activities and also playing an active role to conserving positive well-being and emotions. The main expected impact is to support VET teachers/trainers by providing digital tools and technological material, provide information and supportive material to VET teachers/trainers in designing flexible online learning trainings focusing on competent use of digital technologies.
